SUMMARY

Visionary Solutions Architect and Full Stack Engineer with a proven track record of aligning enterprise security (SOC2/PCI) with scalable, AI-integrated development. Over 6 years of experience architecting full-stack solutions across diverse ecosystems (Python/Django, Laravel, React) and bridging back-end infrastructure with responsive front-ends (HTMX, Tailwind CSS). Highly proficient in utilizing AI coding assistants (Claude Code, GitHub Copilot, Gemini) to aggressively accelerate delivery. Adept at translating complex business requirements into automated, maintainable, and rigorously tested code. Fully available for AEST overlap.

TECHNICAL EXPERTISE

- **Back-End & Architecture :** Python, Django, Django REST Framework, Laravel, PostgreSQL, C# (Unity/WPF), APIs, Celery, Redis,Node.js, Next.js.
- **AI & Prompt Engineering :** Claude Code, GitHub Copilot, Gemini, OpenAI API integrations. Precise prompting and AI PR reviews.
- **Front-End & UI :** Django Templates, HTMX, Tailwind CSS, React (RTK Query/Inertia.js), HTML/CSS, Figma, Magic Patern, responsive design.
- **DevOps, Security & GRC :** Docker, Git/GitHub, Cloud Deployments, SOC2/PCI DSS/ISO Compliance, "Security by Design", M365/Active Directory.
- **Strategic Solution Architecture:** Bridging **Business Process Management (BPM)** with technical execution. Expert in translating complex organizational bottlenecks into automated software solutions while managing multi-vendor accounts (Slack, Adobe, ISP) and technical budgets.

WORK EXPERIENCE

IT Consultant | SkyBridge BPO Solutions

March 2026 (Consultancy)

- **Automated HR & Hiring Workflows:** Built and deployed an integrated HRIS and automated recruitment funnel, optimizing onboarding and applicant data pipelines.
- **Digital Infrastructure & Web Development:** Developed and customized the company's core WordPress platform to establish a high-availability online presence.
- **IT Consultancy :** Provided strategic IT consultancy to align technology solutions with business goals, budget, and existing infrastructure. Assessed current systems and recommended cost-effective improvements to optimize performance and scalability.

Lead Full Stack Developer & IT Manager | EmpireOne BPO Solutions Inc.

June 2024 – March 2026

- **Full-Stack Application Development:** Architected and engineered custom internal management platforms and web automation systems using Laravel, React, Redux, and Node.js RESTful APIs.
- **AI-Accelerated Engineering:** Spearheaded AI-assisted development workflows (Claude Code, GitHub Copilot) across the engineering team to accelerate feature delivery, streamline code reviews, and automate pull requests.
- **Security & Compliance Engineering:** Implemented "Security by Design" application standards and secure data handling controls to meet SOC2, PCI DSS, and ISO audit requirements.
- **Engineering Leadership:** Led and mentored a team of 10+ developers and technical staff, establishing CI/CD pipelines, code quality standards, and technical onboarding schedules.
- **High-Availability Operations:** Oversee system architecture and automated backup/disaster recovery (BDR) protocols, ensuring continuous deployment reliability across core operational platforms.

Adjunct IT Instructor | Central Philippine State University

January 2026 - May 2026

- **Subject Expertise:** Instruct undergraduate students in **Computer Networking** and **Business Process Management.**
- **Mentorship:** Translate complex theoretical concepts into practical applications, reinforcing the ability to train junior corporate staff and communicate technical strategies to stakeholders.

Freelance Developer

March 2020 – February 2026

- **AI-Assisted Engineering:** Acted as principal developer utilizing AI coding assistants (Claude, Copilot) to rapidly prototype and build multi-tier web applications, breaking down complex client specifications into actionable pull requests.
- **Cross-Functional Team Oversight:** Directed small developer teams, contractors, and UI/UX designers across client projects, establishing development standards, code reviews, and milestone deliverables.
- **Government & Enterprise Projects:** Managed end-to-end delivery of custom solutions, including a municipal census system with geo-tagging, enterprise inventory tracking software, and cross-platform mobile educational tools.

Technical Assistance Crew | PARASAT CABLE TV

August 2023 – June 2024

- **Internal Tooling & Workflow Automation:** Developed an automated internal ticketing and operational tracking system using custom script integrations to streamline incoming request categorization and processing.
- **Data Visualization & Analytics Dashboard:** Built a customized analytics dashboard to aggregate operational data, providing management with real-time visual insights for preventative maintenance and system optimization.
- **Network & API Configuration:** Configured customer-premises equipment (ONTs, Mesh Wi-Fi) and diagnosed network layer issues to optimize connectivity protocols across client deployments.

IT Officer | Raz Pharmaceuticals Products & Trading

January 2021 – March 2022

- **System Architecture:** Architected a custom web-based system to streamline core business operations.
- **Infrastructure:** Established and configured the company's complete IT infrastructure, including network hardware and workstations.
